## **PATCHING SPECIFICATIONS**

**MIXTURE:** The mixtures used for resurfacing existing surface-treated streets shall conform to the specifications of Aggregate Base Course (CABC) for the Base Course, Type I19.0C for the Binder Course, and Type SF9.5C for the Surface Course as described in the North Carolina State Department of Transportation "Standard Specifications for Road and Structures," latest edition.

**THICKNESS:** Patching and Mill and Place shall consist of approximately two (2) or three (3) inches of Binder Course asphalt as described on the Bid Form and two (2) inches of Surface Course asphalt. This thickness may be decreased adjacent the existing curb and gutter or at high spots in the old pavement. At low spots, the thickness shall be increased so that the finished surface shall have a uniform grade and cross section.

All manholes and water valves are to be adjusted to finished grade by the contractor.

**TACK COAT:** Before applying Binder or Surface Course Asphalt as resurfacing, a tack coat of AC-20 or emulsified asphalt shall be applied to the old surface.

**FULL DEPTH PATCHING:** Areas of full depth patching will be determined by the Director of Public Works or his Designee and will consist of eight (8) inches of CABC aggregate material compacted and two (2) inches of asphalt Surface Course.

**PAYMENT:** Resurfacing shall be paid for at the contract unit price per square yard, in place on the road, completed and accepted. Delivery tickets showing the composition of each load shall be furnished to the Director of Public Works or his Designee at the time the load is delivered to the paver.

**WEATHER LIMITATIONS AND PROTECTION FROM TRAFFIC:** During all operations, the contractor shall protect the pavement from all traffic other than essential to the work.

Bituminous mixtures shall not be produced or placed during rainy weather when the subgrade or base course is frozen or when the moisture on the surface to be paved would prevent proper bond. Bituminous material shall not be placed when the air temperature measured in the shade away from artificial heat at the location of the paving operations is less than 40 degrees Fahrenheit.

**DISPOSAL:** All excavated or excess material shall be loaded, hauled off site and disposed of at the contractor's expense.
