# CARTERET COUNTY HEALTH DEPARTMENT

Pest Management Division  
3820 Bridges Street, Suite A - Morehead City, N.C. 28557

Paula Stanley, Interim Health Director

*This is an updated list of the private businesses and/or individuals whom have their license to trap NUISANCE WILDLIFE in our county. Our Animal Control Officers **DO NOT** have these licenses. Please direct the public to the following ones on this list. (They are separate from us and do have fees.)*

## Wildlife Damage Control Agents

- |                                 |                                     |
|---------------------------------|-------------------------------------|
| 🐾 David Davenport (Carteret)    | 252-813-0832 (all animals)          |

The public can also call NC WILDLIFE 1-800-662-7137 for further information on trapping and transporting wildlife or any other important issues.

=====

**If an animal is displaying any signs of RABIES - IMMEDIATELY contact the Carteret County Animal Control at 252-728-8585 or 911 COMMUNICATIONS BY DAILING>> 911**

**FYI** ---- Symptoms usually develop between 20 and 60 days after exposure.

Rabid animals may become aggressive, combative, and highly sensitive to touch and other kinds of stimulation and they can be vicious. This is the "furious" form of rabies, the kind traditionally associated with mad dogs.

There is also a "dumb" form of the disease in which the animal is lethargic, weak in one or more limbs, and unable to raise its head or make sounds because its throat and neck muscles are paralyzed. In both kinds of animal rabies, death occurs a few days after symptoms appear, usually from respiratory failure.

Thank you,  
Vicki C Avino, Office Assistant V
