

Hurricane Dorian

**Update: Tuesday, September 3, 2019
11:00am**

- Town Hall will be open for normal business hours (8am-4:30pm) Tuesday and Wednesday. We urge all Atlantic Beach residents, property owners and visitors to take necessary measures to secure your personal property and effects while we have a few days to be vigilant. Review your personal emergency plans and locate your town Re-Entry Pass and monitor our media sites (our Email Blasts and Facebook posts) for future details.
- Atlantic Beach residents and property owners are encouraged to locate your permanent green re-entry pass. If you need a replacement pass, they are available at our Town Hall during normal business hours. The cost of a replacement pass is \$25.00.
- No Re-Entry Passes will be issued after the 36 hour landfall determination has been made as Town Hall staff will be making final preparations for the storm and computer systems packed away. A re-entry pass only pertains to re-entry to the island into and onto the streets of Atlantic Beach if a decision is made to close the bridge during or after the storm. NC Hwy 58 will open for traffic to pass thru from town to town on the island and /or exit the island; but each town may have curfews in effect.
- Property owners may authorize someone to get a re-entry pass on their behalf by completing the form found online. **<http://atlanticbeach-nc.com/departments/general-information/hurricanesemergency-management/hurricane-re-entry/>**

- Waste Industries will pick up their normal routes on Tuesday and Wednesday. Pick up for later in the week is not yet determined. After pick up, please attend to your roll out cart or have a friend or neighbor pull your roll out cart back onto your property so it is not left on the street to become lost or blown away. Their ability to provide service is affected by the ability to gain access to the landfills after the storm.
- Our town departments are prepared and ready to respond and serve the public as the situation requires. Our auxiliary pump and debris removal contractors are on stand-by.
- Our beaches will be under a RED FLAG warning for the next several days. Swimmers and surfers are strongly advised against going into the water as conditions for strong rip tides will be forming.
- Even if the center of the storm remains offshore, coastal flooding, heavy rains and hurricane force winds of more than 75 mph are expected here starting Wednesday night through Thursday.
- Duke Energy crews are on stand-by as the loss of electrical power is always a factor during these storms. Plan accordingly.
- Sign up your cell phone and land lines for the Carteret County Code Red Emergency Alert Notification system. There is no charge for this service. Visit the website to sign up today:
